## Professional Summary

---

AI Trainer and AI/ML Engineer with hands-on experience in training, evaluating, and improving large language models. Experienced in ranking and correcting model outputs, writing reference solutions and structured critiques, applying rubric-driven quality standards, and annotating data across multiple AI training platforms including Invisible Technologies, SuperAnnotate, SME Careers, and Alignerr. Combines this with an engineering background in Python, Machine Learning, Deep Learning, computer vision, NLP, and LLM/RAG systems, which allows me to judge model responses on correctness, reasoning quality, and instruction-following at a technical level. Strong written communication, attention to detail, and a record of maintaining high acceptance rates under strict quality review. M.Tech in Artificial Intelligence (CGPA 9.0/10).

## Core Competencies

---

- **Model Evaluation & Ranking:** Response comparison, preference ranking, correctness and reasoning checks, instruction-following assessment, error and failure-mode identification
- **Data Creation & Annotation:** Reference solution authoring, prompt and response writing, labeling, annotation, structured critique and feedback writing
- **Quality & Guidelines:** Rubric-driven review, guideline adherence, consistency across tasks, quality assurance, fast adaptation to new tools and project instructions
- **Coding & Technical Review:** Python code evaluation and debugging, algorithm and logic verification, technical Q&A across data science and machine learning
- **Safety & Robustness:** Adversarial thinking from cybersecurity background, probing models for weaknesses, identifying unsafe, incorrect, or inconsistent behavior

## Professional Experience

---

### AI Data Trainer — Invisible Technologies

Remote (Contract) 2022 – Present

- Evaluate, correct, and rank model-generated Python and technical responses against correctness, reasoning quality, and instruction-following criteria for large language model training pipelines.
- Author reference solutions and structured critiques used as supervision data, clearly explaining where and why a response succeeds or fails.
- Apply rubric-driven review standards across tasks, maintaining a high task acceptance rate under strict quality review.
- Follow detailed project guidelines and adapt quickly to new task types, rubrics, and updated instructions.

### AI Trainer (Project-Based) — SuperAnnotate, SME Careers, Alignerr

Remote

- Completed project-based AI training assignments across multiple platforms, labeling, annotating, and evaluating model-generated outputs against detailed project guidelines (Data Science AI Trainer at SuperAnnotate).
- Delivered consistent, high-quality curated data using rubric-driven review standards, with clear written feedback explaining errors and how to improve them.
- Worked with proprietary annotation tools and adapted to project-specific instructions across different platforms and task types.

### AI/ML Engineer — DevMatrix

Jun 2025 – Present

- Built applications using Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), and Graph RAG, gaining practical insight into how generative models behave, fail, and are evaluated.
- Applied prompt engineering, retrieval optimization, and evaluation to improve the quality and reliability of AI outputs.
- Designed Machine Learning and Deep Learning workflows for anomaly detection, predictive analytics, and data-driven insights on a UK-based fintech project covering fraud detection and financial data analysis.
- Wrote Python scripts, data pipelines, and REST APIs to automate data preprocessing, processing, and reporting.
- Collaborated with cross-functional teams to understand requirements and deliver scalable solutions.

## Technical Skills

---

- **AI Training & Evaluation:** Data Annotation & Labeling, Response Ranking, Rubric-Based Review, Structured Critique Writing, Reference Solution Authoring, Quality Assurance

- **Programming:** Python, Object Oriented Programming (OOP), SQL, Data Structures & Algorithms (DSA), JavaScript, C++
- **Machine Learning & Deep Learning:** Classification, Regression, Clustering, Anomaly Detection, Feature Engineering, CNNs, Transfer Learning, TensorFlow, PyTorch, Scikit-learn
- **NLP & Generative AI:** LLMs, Prompt Engineering, RAG, Graph RAG, Embeddings, Semantic Search, Text Classification, LangChain, LlamaIndex, Hugging Face Transformers, OpenAI API, Gemini API
- **Computer Vision:** Image Classification, CNN-based models, Transfer Learning
- **Data & Backend:** Pandas, NumPy, Matplotlib, FastAPI, Flask, REST APIs, Pydantic, Streamlit, MongoDB, Vector Databases (Qdrant, ChromaDB, Pinecone)
- **Tools & Deployment:** Git, GitHub, Docker, AWS, DVC

## Selected Projects

---

**NeuroScholar – Hybrid RAG System for Research Paper Comprehension**     *Python, LangGraph, RAG, Graph RAG, ChromaDB, NetworkX*

- Developed a privacy-preserving AI assistant for research paper comprehension combining Vector RAG and Graph RAG.
- Built a LangGraph pipeline for query routing, vector retrieval, graph retrieval, context merging, response generation, and iterative evaluation.
- Implemented an LLM-as-a-judge evaluation loop to assess generated responses and improve retrieval and generation quality.

**DocuMind AI – Retrieval-Augmented Document Question Answering**     *LangChain, OpenAI API, Pinecone, ChromaDB, Streamlit*

- Developed a RAG-based document question-answering system with document ingestion, text chunking, embeddings, semantic search, and LLM response generation.
- Built a Streamlit interface supporting PDF, DOCX, and TXT uploads, and tuned retrieval quality using top-k and chunk-size settings.
- [GitHub Repository](#)

**Mini Food Vision – Food Image Classification**     *TensorFlow, CNN, Transfer Learning*

- Developed a CNN-based image classification model for 101 food categories using the Food-101 dataset, applying transfer learning to improve performance and reduce training requirements.

**DDoS Attack Detection Using Machine Learning**     *Python, Machine Learning, Cybersecurity*

- Built a supervised machine learning system to detect and classify DDoS attacks from network traffic data, covering preprocessing, feature extraction, training, and evaluation.

**Insurance Premium Predictor – End-to-End ML Application**     *Python, Scikit-learn, FastAPI, Docker, AWS*

- Deployed an end-to-end ML application with a FastAPI backend, Pydantic validation, and Docker containerization on AWS.
- [Backend Repository](#)

## Education

---

**Islamic University of Science & Technology, Pulwama**     Aug 2024 – Jun 2026  
Master of Technology (M.Tech) in Artificial Intelligence     **CGPA: 9.0/10**

**Government College of Engineering & Technology, Safapora**     2018 – 2023  
Bachelor of Technology (B.Tech) in Computer Engineering     **CGPA: 7.5/10**

## Certifications

---

- Python with Data Science & Machine Learning – IIT Jammu
- IBM Data Scientist Professional Certificate – Coursera
- Machine Learning – University of London, Coursera
- Full Stack Web Development Bootcamp – AlmaBetter

## Achievements

---

- Ranked among the top cybersecurity learners in India and achieved a Top 0.1% global ranking on TryHackMe.
- Maintained a 500+ day coding streak on GitHub.
