PROFESSIONAL SUMMARY

Cybersecurity-focused technical professional with a B.Tech in Computer Engineering and an M.Tech in Artificial Intelligence. Ranked in the **top 0.1% globally on TryHackMe**, with **500+ rooms completed**, developing practical exposure to cybersecurity concepts and hands-on problem solving. Strong technical foundation in Python, C++, machine learning, network traffic analysis, and Git. Developed a machine-learning-based DDoS attack detection system and a fingerprint-based biometric access-control system. Maintained a **500+ day GitHub contribution streak**, demonstrating consistency and commitment to continuous technical learning.

CYBERSECURITY PROJECTS

DDoS Attack Detection Using Machine Learning — Python | Scikit-learn | Network Traffic Analysis | Cybersecurity

- Developed a supervised machine-learning system to detect and classify DDoS attacks from raw network traffic.
- Implemented traffic preprocessing, feature extraction, model training, and inference.
- Compared multiple classifiers and evaluated performance on held-out network traffic.
- Applied machine-learning techniques to a practical network-security problem.

Fingerprint-Based Door Lock System — C++ | Arduino | AS608 Fingerprint Sensor | Biometric Access Control

- Developed a biometric access-control system using an AS608 fingerprint sensor.
- Implemented two-phase fingerprint enrollment and storage for up to 127 templates.
- Designed fail-secure relay logic for controlled access.
- Applied embedded programming concepts to a practical physical-security system.

CYBERSECURITY ACHIEVEMENTS

- **Top 0.1% globally on TryHackMe**
- **500+ TryHackMe rooms completed**, developing hands-on exposure to cybersecurity challenges and concepts.
- **500+ day GitHub contribution streak**, demonstrating consistent technical practice and learning.

TECHNICAL SKILLS

Programming: Python, C++, JavaScript, HTML, CSS
Cybersecurity: Network Traffic Analysis, DDoS Detection, Threat Classification, Biometric Access Control
Machine Learning: Classification, Regression, Feature Engineering, Model Evaluation
Tools & Technologies: Git, Scikit-learn, Pandas, NumPy, TensorFlow, Docker
Backend: FastAPI, REST APIs
Development: GitHub, Version Control, Data & Model Evaluation

EDUCATION

M.Tech — Artificial Intelligence
Islamic University of Science & Technology, Pulwama | Aug 2024 – Jun 2026 | **CGPA: 9.0 / 10**

B.Tech — Computer Engineering
Govt. College of Engineering & Technology, Safapora | 2018 – 2023 | **CGPA: 7.5 / 10**

CERTIFICATIONS

- IBM Data Scientist Professional Certificate — Coursera
- Machine Learning — University of London, Coursera
- Python with Data Science & Machine Learning — IIT Jammu
- Full Stack Web Development Bootcamp — AlmaBetter
